

TraceTek TT-FFS PROBE TESTER

TEST DEVICE FOR TT-FFS PROBE

PRODUCT OVERVIEW

Simple tool

The TT-FFS Probe Tester is a battery powered device that provides the capability of testing a TT-FFS Probe to determine whether it is functioning properly.

The TT-FFS Probe Tester is designed for use in ordinary areas.

For a TT-FFS Probe with MC series metal connector, the TT-FFS Probe Tester is directly connected to the TT-FFS Probe. For a TT-FFS Probe without metal connector (L series), the TT-FFS-ALLIGATOR4CLIP-MC cable end adaptor is attached to the TT-FFS Probe Tester. The 4 colored alligator clip wires are connected to the corresponding colored wires of the TT-FFS Probe.

Visual indication

The TT-FFS Probe Tester produces flashing signals using bright red LEDs that indicate different operational conditions of the TT-FFS Probe. The TT-FFS Probe Tester also monitors its battery voltage and produces a special flashing signal to indicate that the voltage is low and the batteries need replacing.

ORDERING INFORMATION

Catalog number	P/N	Description
TT-FFS Probe Tester	P000001048	Battery powered device used to evaluate TT-FFS Probe operational state. Includes TT-FFS-ALLIGATOR4CLIP-MC cable end adaptor for use with TT-FFS Probe without metal connector (L series)

PRODUCT CHARACTERISTICS

Weight	0.3 kg (0.7 lb) nominal
Light source	3 high intensity, high efficiency red LEDs
Battery information	2 "AA" Alkaline Long Life
Projected battery life	1 year – nominal
Recommended battery replacement interval	1 year or whenever low battery signal is detected
Duration of low battery signal	Minimum 30 days at 20°C (68°F)
Maximum ambient temperature	40°C (104°F)
Minimum ambient temperature	-20°C (-4°F)
