

## TraceTek Installation Training Record

Project _____	Raychem authorized service representative _____		
Owner _____	Address _____		
Building/Unit _____	Street _____		
City _____ State _____	City _____	State _____	Zip _____
Contact _____		Telephone _____	

**The following items have been reviewed:**

### Overview of TraceTek Leak Detection System

- Operating principle and system components

### Leak detection layout and bill of materials

- System installation drawings and/or system details for project  
Applicable TraceTek product selection guide:
  - TT1000/water (H53874)
  - Environmental (H54783)
- Complete bill of materials for project, including cable lengths, components, and tools

### General installation instructions

- General instructions for commercial buildings (H55522)
- General instructions for environmental applications (H55523)
- For DC piping: TraceTek installation guide for double containment piping (Lit-138)
- For DC tanks: TraceTek general installation instructions for double wall tanks (H55313)

### Alarm module installation and testing

- TTDM alarm and locating module (H55471)
- TTG multiple channel alarm module (H54831)
- TTA single channel alarm module (H54832)
- TTC single channel module (H53813)
- Other: \_\_\_\_\_

### Timing/preparation for sensing cable installation

- Major construction complete
- Cleaning of area where cable will be installed
- For DC piping: TraceTek Containment Piping Readiness record (H55549)
- Mechanical as-built drawings provided

### Sensing cable installation instructions, including proper handling (do's and don'ts)

- TT1000 modular sensing cables (H55555)
- TT3000 and TT5000 series modular sensing cables (H55357)
- TT3000 and TT5000 bulk sensing cables with procedures for DC piping (H55553)

### Sensing cable test procedures

- TraceTek Portable Test Box (PTB) operating instructions (H55524)

### If applicable: demonstration of cable connector kit installation instructions

- For TraceTek jumper cable (H55005)
- For TT3000 sensing cable for conductive liquids (H55003)
- For TT5000 fuel sensing cable (H54830)

### Completing the leak detection system

- Installation of components; completing the TraceTek circuit
- TraceTek pre-commissioning record (H55550)
- As-builts of sensing cable layout with mapping reference points

### Commissioning and mapping

- TTDM commissioning record (H55551)
- Other: \_\_\_\_\_

To obtain copies of installation instructions from our Fax-on-demand system, dial 1-800-329-4494 (1-415-361-2168 for international access). A voice prompt will lead you through the process.
